

POCKLINGTON COTTAGES

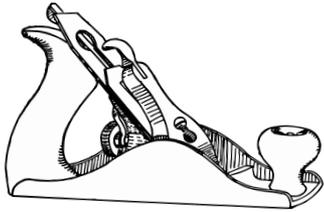

In light of the COVID19 pandemic we have taken several measures to ensure our cottages are safe for your visit.

The guest booklet has been removed from each cottage but you can still access all the information right here (although please be aware that some of the pubs and restaurants mentioned will have limited hours or availability due to their own Covid19 preparations).

Also, all the tourist brochures have been removed from the cottages, but do feel free to chat to us if you want any local knowledge about things to see and do.

Welcome to

Carpenter's Cottage

We hope you enjoy your stay.

In this folder are a few details that should help you get the most out of your time here.

If you have any other queries during your stay please give us a call and we will do what we can to help.

RUBBISH AND RECYCLING

Recycling is different across the UK. The East Riding of Yorkshire leaflet is enclosed for you to see our local system. In brief, the three bins outside are designated as follows:

- **GREEN BIN:** All non-recyclable waste

- **BLUE BIN:** All recyclables e.g. paper, glass, hard plastic etc. These do not need to be bagged first. Just put everything in together.

- **BROWN BIN:** Food and garden waste (please use the caddy bags provided in the cottage with the small brown bin)

You will find the bins behind the woodshed.

HEATING and HOT WATER

Carpenter's Cottage is well insulated and is easy to keep cosy. In cold weather the central heating will be on between 7:30 am and 10:30 pm, at 19°C. The controls are downstairs by the dining table. It controls:

LIVING ROOM: under floor heating

BEDROOM: radiator (also has its own temperature valve)

BATHROOM: radiator (turned ON/OFF with either white knob)

ON/OFF
Flame = ON
Snowflake = OFF

Use arrows to set
different
temperature,
then 'A' to 'accept'

The hot water is heated whenever you switch on a hot tap.

The SLOWER you run the tap, the HOTTER the water will be.

WOOD BURNING STOVE

The wood burning stove makes the living room really cosy. There is kindling, paper and wood for you to use during your stay. Let us know if you run low on anything.

FIRE STARTING TIPS – place in the grate:

- 1 small log (at the back)
- 2 loosely scrunched pieces of paper
- 6 pieces of kindling
- Open bottom door 1 inch
- Light paper in 3 places then close main door

Once kindling starts to burn close bottom door. Your fire should now take off.

Leave this vent alone and it will help keep the glass clear

Keep this vent open until the fire is roaring, then spin it almost closed to slow the fire down

Do remember that, once lit, the stove will become **very hot to touch** so please use the glove provided.

If you would like help getting the fire started please don't hesitate to contact us (you wouldn't be the first!). We will be happy to help if we are around.

FUSE BOX

The fuse box is located on the wall under the stairs. In the unlikely event that a fuse trips or a bulb blows please contact us and we will get you back up and running straight away.

FIRST AID

You will find a First Aid kit under the sink.

WANT TO BOOK AGAIN?

We love living in Pocklington and are delighted when our guests fall in love with it too!

What sometimes takes the shine off it is when guests have to pay a booking fee on top of the nightly rate.

For that reason we set up our own website:

pocklingtoncottages.co.uk

(...so why not spread the word?)

Return the seat to its **ORIGINAL POSITION** by pressing the footrest back with your feet until it clicks.

ALL ABOUT ASHES

If you are going to enjoy the fire while you are here there are three things you should know about ashes:

- 1** Ash in the grate is fine. It does not need to be spotless.

- 2** If the ash pan underneath the fire is full lay a large piece of newspaper on the floor and carefully tip the (cold!) ashes onto it. Wrap it up like it's a bag of chips and pop it in the green bin.

- 3** Ash cleans! The top vent on the fire 'washes' the glass with air, stopping the build up of soot. This is not always perfect but cleaning the glass is easy. Dip a damp piece of kitchen roll in the cold ashes and rub it over the glass. Wipe off with a clean piece of paper and the glass should be back to normal. It's like magic!

Electric Razor?

If you need to charge your electric razor you'll find a socket on the right of the bathroom mirror.

Bath or Shower?

Push silver barrel **down** for bath...

...or pull **up** for shower.

COURTYARD and GARDEN

Park wherever you want in the courtyard (although it helps if you make it easy to get to the wood in the wood-shed).

If you have a bike and want to keep it locked away you can keep it in the locked workshop. Just ask and we'll give you the combination for the door.

Do please make yourselves at home in our garden. There's a washing line, places to sit and you are very welcome to help yourself to any fruit, veg and herbs when in season.

Our chickens are very friendly and always enjoy seeing visitors. You will find them at the top end of the garden, along with some seats – an ideal place for evening sun in Summer. The gate has a simple hook on the top left. If you take food up there Phyllis will probably jump up into your lap. She is very friendly but you have been warned!

We'll gladly give you some corn to take to them. They also like bread, cake and biscuit crumbs!

GETTING AROUND

The main bus stop is opposite the Bus Station on Station Road.

(5 minute walk down the main street, straight past Judson's to the Pocela Centre and turn left)

The **X46** and **X47** both get to York in about 30 minutes, and there is one bus at least every hour.

The same buses travel in the opposite direction to Beverley (30 mins) and Hull (1 hour)

There is a Bus Timetable with the other leaflets by the door.
